OBJECTIVE & PERSONAL STATEMENT

I am a medical student who is really eager to see and work on how life is inside a lab and the processes of scientific studies, I also would like to gain research skills within my education to become a clinical scientist after my graduation. My main interests are Pathology and Bioinformatics.

Since I am aiming to be a researcher in future, being part of a both clinical work and clinical research as an intern is the opportunity that I am looking for. I am sure that I will sustain my ambition and passion for learning and working in my whole life.

EXPERIENCE

| | |
|--|--------------------------------|
| Universität Ulm / Vettorazzi Lab Learned lab techniques like PCR, cell culture, histological sectioning/staining, western blot and worked on mice towards glucocorticoids' role on inflammation. | Ulm, DE 07/23 - 09/23 |
| SciLifeLab / Mardinoğlu Group Prepared a comprehensive proteomics report and analyzed Kallisto/DESeq2 data in R. | Stockholm, SE 07/22 - 09/22 |

EDUCATION

| | |
|--|-------------------------------|
| Mersin University Faculty of Medicine Doctor of Medicine, 4th Grade, GPA: 82/100 | Mersin, TR 09/23 – Current |
| Universita' degli Studi di Pisa Facoltà di Medicina e Chirurgia Doctor of Medicine - Erasmus Student | Pisa, IT 03/23 – 07/23 |
| Mersin University Faculty of Medicine Doctor of Medicine | Mersin, TR 09/19 – 02/23 |

SKILLS

- Basic Bioinformatics (R & Python) • Microsoft Office • Linux
- PCR • Histological Sectioning • Cell Culture

LANGUAGES

- Turkish: Native • English: Fluent • German: Elementary
