OBJECTIVE & PERSONAL STATEMENT

I am a junior medical doctor with a strong interest in working in laboratory and contributing to scientific work. My long-term goal is to develop robust research skills and pursue a career as a clinical scientist while continuing to practice medicine. I am particularly drawn to medical pathology and also motivated by opportunities which allow for research. I am seeking a role where I can grow as a resident pathologist while actively participating in studies that advance medical knowledge.

EXPERIENCE

Etlik City Hospital / Pathology Department Working as a Pathology resident, grossing and doing microscopic examinations.	Ankara, TR 08/26 - Current
Ceylanpınar State Hospital / Emergency Service Worked at rural Turkey in an emergency service for four months.	Ceylanpınar, TR 04/26 - 08/26
